

Fortis for eCopy™ ShareScan®

Connector bridges the gap between paper and digital workflow

Fortis for eCopy ShareScan:

- Performs mass data capture
- Automatically captures to a Fortis Database or In Basket
- Reduces labor costs with touch screen technology

With the touch of a button, using **Fortis for eCopy ShareScan**, multifunctional device users can capture documents with eCopy's ShareScan and send it to Westbrook **Fortis** document management software. The connector leverages the open architecture of **Fortis** for seamless connectivity, allowing eCopy ShareScan users with an eCopy-enabled multifunction printer to send scanned documents effortlessly to their **Fortis** database.

On the front end, eCopy ShareScan captures and transforms full-color or black and white paper documents into electronic images extending the capabilities of a digital copier or scanner. With **Fortis for eCopy ShareScan**, users simply select the "Send to **Fortis**" button on the eCopy touch panel, and scanned images are passed to **Fortis**. Once inside the **Fortis** database, users can store and securely retrieve all their business documents in seconds making information decisions based on the latest, most comprehensive data.

The eCopy Suite enables an organization to transform paper documents into information that is easily integrated into commonly used business applications. Using the eCopy products, companies can provide open access to scanning from the office copier or scanner that connects to the company's email, fax, document management system, and other networked enterprise applications. It's a low-cost, easy path to instantaneous distribution and effective management of digital copies of paper documents.

It's easy with Fortis for eCopy ShareScan

- Launch **Fortis for eCopy ShareScan** with one touch
- Start scanning documents
- Specify destination
 - Database
 - Document type
 - Folder
 - In Basket
- File the document into **Fortis** with metadata
